# DeSTSeg | MVTec AD: all 15 categories

Fixed-final 5000 steps | seed 111 | saved predictions | input / ground truth / anomaly map

**Bottle** — broken_large/000

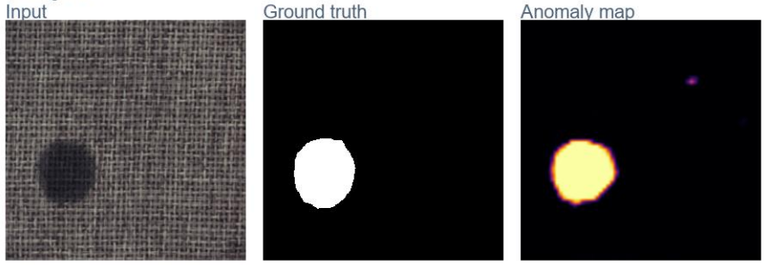

**Cable** — bent_wire/000

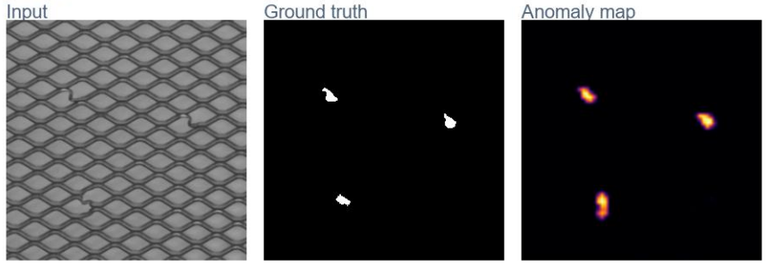

**Capsule** — crack/000

**Carpet** — color/000

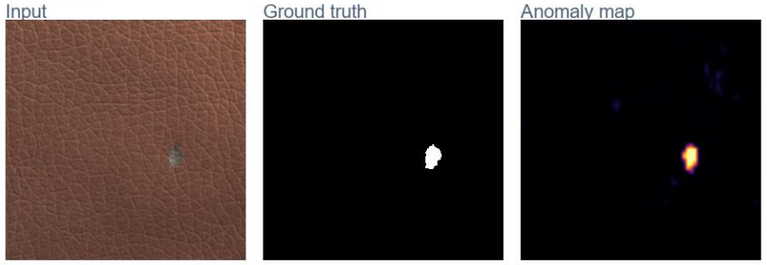

**Grid** — bent/000

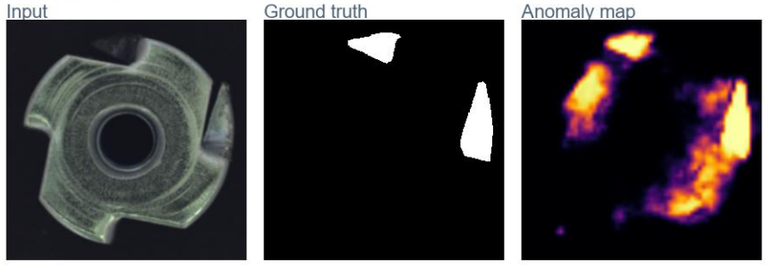

**Hazelnut** — crack/000

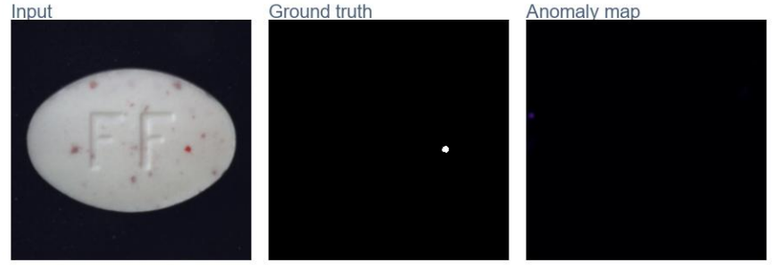

**Leather** — color/000

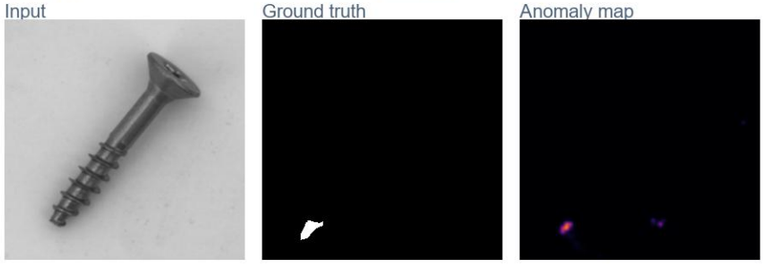

**Metal Nut** — bent/000

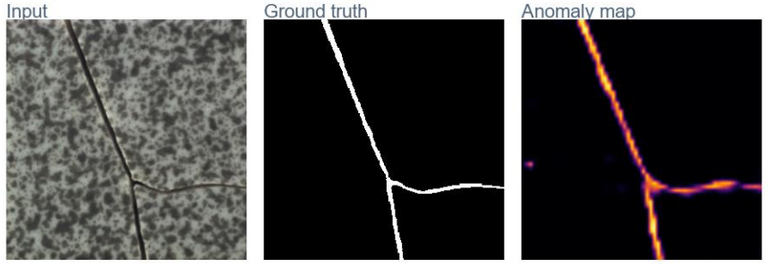

**Pill** — color/000

**Screw** — manipulated_front/000

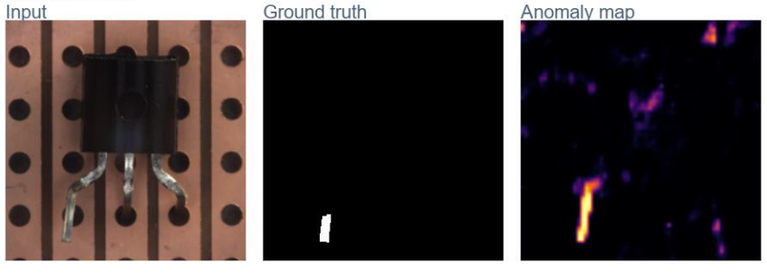

**Tile** — crack/000

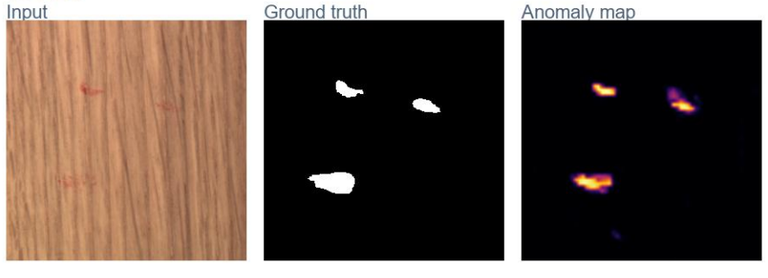

**Toothbrush** — defective/000

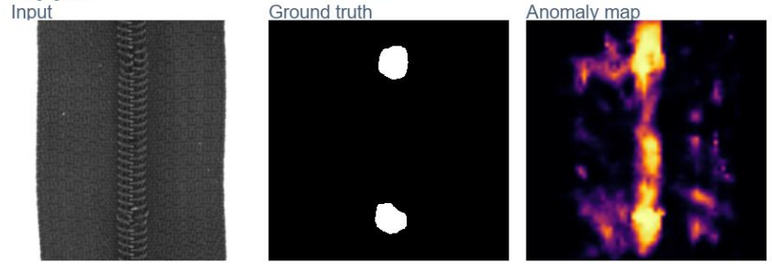

**Transistor** — bent_lead/000

**Wood** — color/000

**Zipper** — broken_teeth/000

Selection: first sorted defective sample per category; independent of scores. Illustrative coverage, not average performance.
GT: common nearest256 masks. Maps: fixed [0,1] model output; no threshold or per-image scaling. Not calibrated probabilities.
