MSFlow | MVTec AD: all 15 categories

Fixed-final 100 epochs | seed 9826 | saved predictions | input / ground truth / additive anomaly map

Bottle — broken_large/000

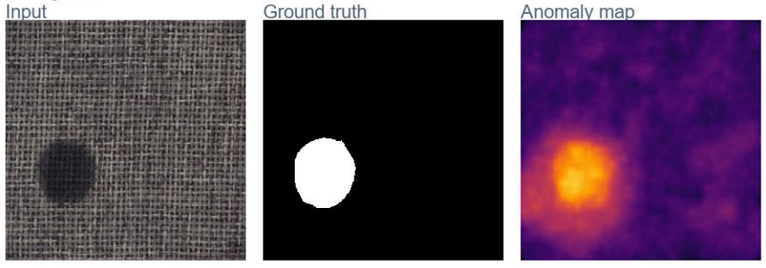

Cable — bent_wire/000

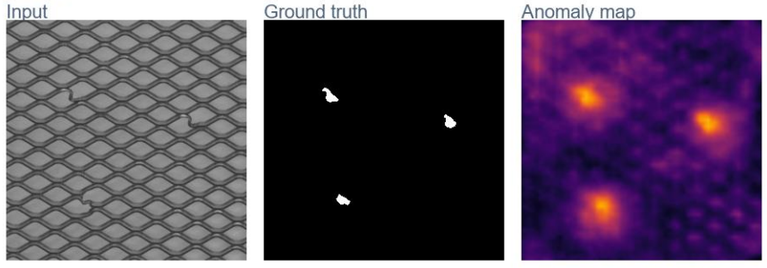

Capsule — crack/000

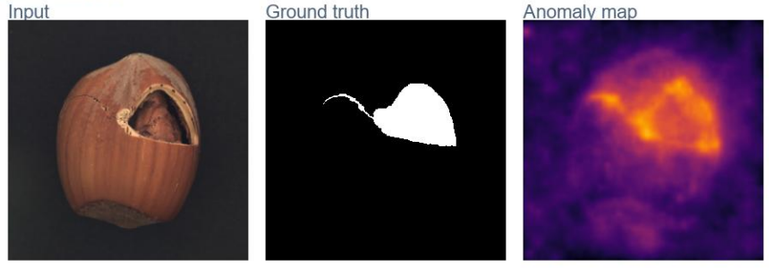

Carpet — color/000

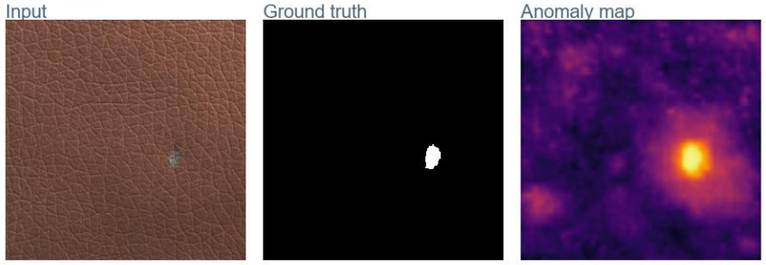

Grid — bent/000

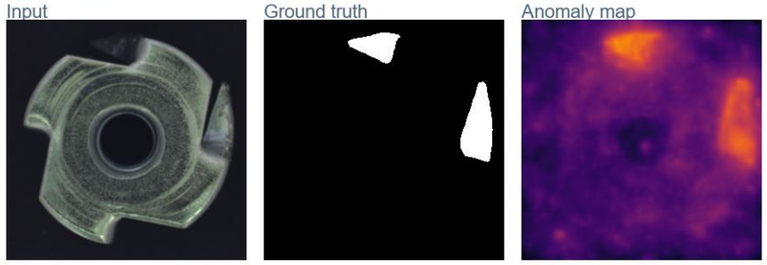

Hazelnut — crack/000

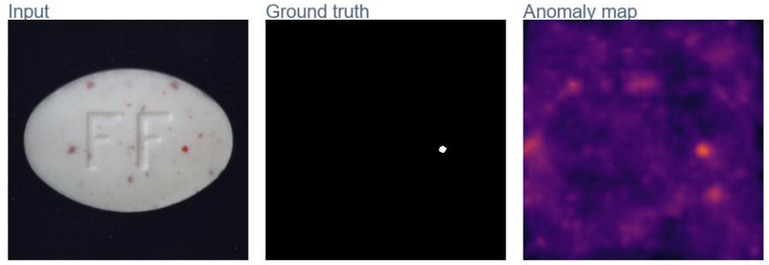

Leather — color/000

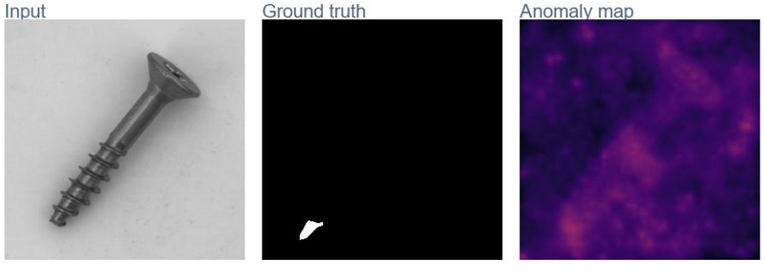

Metal Nut — bent/000

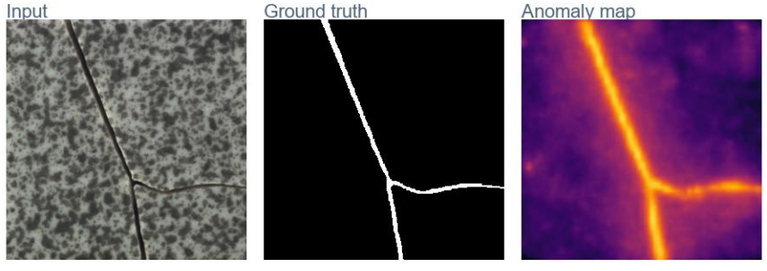

Pill — color/000

Screw — manipulated_front/000

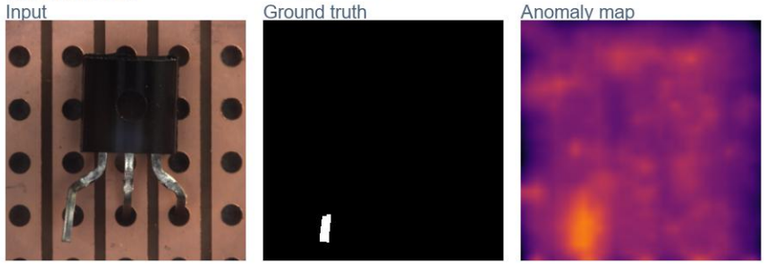

Tile — crack/000

Toothbrush — defective/000

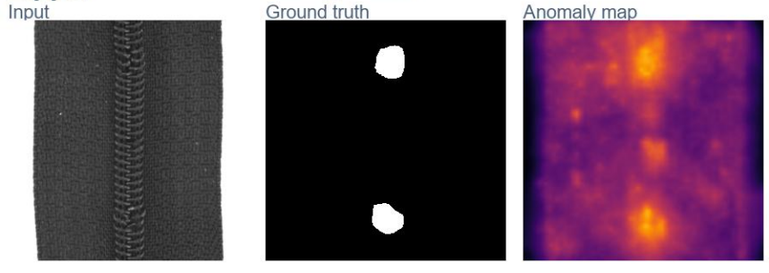

Transistor — bent_lead/000

Wood — color/000

Zipper — broken_teeth/000

Selection: first sorted defective sample per category; independent of scores. Illustrative coverage, not average performance.
GT/maps: native model grid 512 (transistor 256). Additive maps: fixed [0,3]; no threshold or per-image normalization.
